

## **JOB PLACEMENT ASSISTANCE**

**Because obtaining a job in the dental profession is our students' ultimate goal, our experienced Dental Assisting instructors also educate students about the job marketing and application process. We work individually and extensively with each student on resume preparation, interview skills, proper attire, and proper follow up process.**

**With our extensive network we also act as an employment resource, helping place students in touch with dental practices that contact us. Many of our students have received interviews and accepted positions through our network connections.**

**We will educate you and train you on the dental assisting and EFDA professions and will also provide you with all the tools and resources in order to "land" the perfect job.**
